

Dr. Ajita Deshmukh is a passionate Chemistry educator, keen towards making quality chemistry education accessible and fun. She currently works as an Assistant Professor (ICT) with the School of Education and Research, MIT-ADT University, Pune, India, where she trains pre-service teachers. She is also a course developer and mentor for OER4BW (Open Education for Better World), a UNESCO project by University of Nova Gorica, Slovenia. She has previously worked as an Assistant Professor (ICT) at CIET, NCERT and as a Training Coordinator at Teaching-Learning Center, SNDT Women's University, Mumbai. She has contributed as a Co-Instructor, Resource Person and Teaching Associate for NPTEL-SWAYAM and other reputed institutions. She has a popular podcast titled "Che-Mystery" for which she recently won an award at the 25th National AICEAVF at the NCERT. Her expertise makes her a popular face for NCERT sessions and her sessions about online pedagogy and social media in education can be found at NCERT Official channel as well as other institutional channels on YouTube. Her areas of interest are Online education, particularly Open Education and her PhD topic is about leveraging Social Media, particularly Facebook in Education.
